

StarSCAN^{*}

Versions

Current Release: **5.02**

New Features and Capabilities

- **File Management:**
 - File management services are now available to help manage your data files on the StarSCAN. To manage files on the StarSCAN, select “Show Shortcuts>Tool Menu>Manage Files.” File management operations are also available throughout the StarSCAN application wherever files are created.
 - The types of files that can be managed include Custom Display templates, Data Recordings, Data Recording Templates, DTCs Lists, Event Data Snapshots, Freeze Frame Snapshots, Session Logs, and Vehicle Scan Reports.
 - Files managed by the File Management System can be renamed, deleted, copied to the USB Storage Device, copied from the USB Storage Device, uploaded to DealerCONNECT, and downloaded from DealerCONNECT.
- **StarSCAN tool updates via the Internet:**
 - This new feature allows you to update your StarSCAN tool via the Internet. The StarSCAN application automatically checks for software updates when you login to DealerCONNECT with your StarSCAN. You can also check for StarSCAN updates manually by selecting “Show Shortcuts>Update Tool.”
 - For more information on this feature, refer to the “Tool Update Instructions” located under the Download Center at www.dcctools.com.
- **RKE bug fix:**
 - Unsuccessful programming of an RKE only key has been addressed in StarSCAN release 5.02.

Updating Your StarSCAN

Be sure to update your StarSCANS using the CD-ROM and USB memory device. It is imperative that you keep the StarSCAN up to date with the latest vehicle changes. See the detailed instructions for

performing an update on the <http://www.dcctools.com> website.

Don't forget: The USB memory device shipped with the updated kit in October. If you need to order more USB memory

devices or USB adapters, you will find links to on-line stores in the updated instructions found on the <http://www.dcctools.com> website.
