

StarSCAN^{*}

Versions

Current Release: **5.01**

New Features and Capabilities

- **New Vehicle Support:** All the data necessary in order to support the '05 WK, '05 LX, and '05 ND.
- **Flash Files:** Up-to-date flash support.
- **File Management:** A new feature that provides the technician with the ability to manage some of the file types that reside on the StarSCAN diagnostic tool. Open the **Show Shortcuts** toolbar, select **Tool Menu**, and press **Manage Files**. Then select the type of file you wish to work with, such as **Data Recording** or a **Custom Display** template. Lastly, at this point you may perform typical file management operations such as deleting or renaming a file, or some more advanced options like copying a file to a USB memory device.
- **Vehicle Connection:** Improved vehicle connection speed.
- **All DTC's feature:** Enhancements have been made to the **All DTC's** feature located under **Systems View**. A list of DTCs may be saved and viewed at a later date. This feature may be of benefit if the vehicle has a history of multiple servicing, or when a technician wishes to recall the original list of DTCs previous to the DTC's having been cleared.
- **Network Topology:** A legend and Tech Tips have been added to the **Network Topology** screen.
- **Misc Functions:** "Program Ignition Keys or Key FOBs" has been simplified.
- **Data Recorder:** The process involved in creating templates and capturing data recordings has been streamlined.

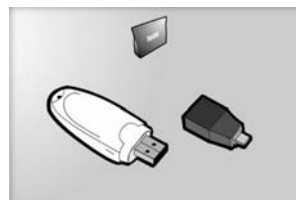

Updating Your StarSCAN

Be sure to update your StarSCANS using the CD-ROM and USB memory device. It is imperative that you keep the StarSCAN up to date with the latest vehicle changes. See the detailed instructions for

performing an update on the <http://www.dcctools.com> website.

Don't forget: The USB memory device shipped with the updated kit in October. If you need to order more USB memory

devices or USB adapters, you will find links to on-line stores in the updated instructions found on the <http://www.dcctools.com> website.
