

# StarSCAN<sup>\*</sup>

## Versions

---

Current Release: **5.01-SP1**

### Service Pack Release:

- StarSCAN 5.01-SP1 is a service pack release. Due to a pending upgrade to DealerCONNECT software a modification to the StarSCAN tool's underlying software became necessary to make it compatible. While no new features or any other changes are apparent to the end user, this update should nevertheless be installed immediately. Failure to do so will result in the tool being unable to connect to DealerCONNECT when their upgrade is launched.

## Updating Your StarSCAN

Be sure to update your StarSCANS using the CD-ROM and USB memory device. It is imperative that you keep the StarSCAN up to date with the latest vehicle changes. See the detailed instructions for

performing an update on the <http://www.dcctools.com> website.

Don't forget: The USB memory device shipped with the updated kit in October. If you need to order more USB memory

devices or USB adapters, you will find links to on-line stores in the updated instructions found on the <http://www.dcctools.com> website.
